

EQUAFLUX 303

AUTOMATIC PULSATION DAMPERS

- Product designed and constructed in Italy
- Operates with non-lubricated air
- High performance and strength
- Suitable for minimising pulsating flows
- Suitable for minimising vibrations during the operation of the pump

The EQUAFLUX dampers are used with fluids with a high apparent viscosity, also with large suspended solids.

They adapt automatically to the system conditions, without any manual adjustments or calibrations. The high capacity of minimising pulsations, vibrations and water hammer renders this component ideal for protecting the system, providing a regular outlet flow.
